

MARITIME ARBITRATION TRAINING

Introduction to International Arbitration (ACIArb)

Arbitration is widely used among international shipping operators to solve almost every kind of dispute and, consequently, arbitral clauses are included in many maritime contract forms. This is due to its remarkable advantages over litigation, such as flexibility, specialization, confidentiality and the possibility for the parties to determine every aspect of the procedure according to their needs.

This introductory programme will provide an understanding of the general principles of international arbitration in a maritime context and will provide the foundation of good practice and procedures including: **Comparison of Dispute Resolution Procedures, Essential features of UNCITRAL laws and rules, Organizing Proceedings, Costs and Interests, Drafting Arbitral Awards**

The programme is designed specifically for students and professionals engaged in the shipping and maritime industry.
